An Affection of the Liver.

As the liver is the seat of the bile, and the source of the nourishment of the body, it is of great importance that it should be kept in a healthy state. When it is affected, the bile is either increased or diminished, and the nourishment of the body is consequently affected. The symptoms of an affection of the liver are, a yellowishness of the skin, a swelling of the belly, and a pain in the right side.

Let the patient be kept in a temperate diet, and avoid all such things as are hot and dry, as wine, spirits, and rich food.

But the most important thing is to keep the liver cool, and to prevent the bile from becoming too thick. For this purpose, the patient should take a course of gentle purgatives, such as the decoction of senna, or the powder of rhubarb.

When the liver is affected, the bile is either increased or diminished, and the nourishment of the body is consequently affected. The symptoms of an affection of the liver are, a yellowishness of the skin, a swelling of the belly, and a pain in the right side.

Convenient to eat Meat, the Liver is affected, the bile is either increased or diminished, and the nourishment of the body is consequently affected. The symptoms of an affection of the liver are, a yellowishness of the skin, a swelling of the belly, and a pain in the right side.

Of the Eclipses which will Happen in this Year 1681.

FOUR Times in this Year 1681. will the Inhabitants of this Earthy Star be deprived of the Light of the two great Luminaries of Heaven, viz. Twice of the Sun, and as often of the Moon. But we in these *British Islands*, shall only behold the later Eclipse of the Moon, the other three being invisible to us.

The first Luminarian defect in Order, will be of the Moon. On *February* the 22. day in 14. degrees of *Pisces*, about our eleven of the Clock before Noon, and will be visible to such as inhabit our *Antipodes*.

The Second will be an Eclipse of the Sun on *March* the tenth day, at our one of the Clock in the Morning. Ergo, not to be perceived by us in this Northern Hemisphere; it happens in the beginning of the Fiery Sign *Aries*, and will shew itself to our *Antipodes*, as will the former. God bless our Northern Countrey from turbulent Fiery Actions.

The third Luminarian defect will be of the Moon, on *August* the Nineteenth, about our three a clock in the morning, in six degrees of the Celestial Fishes. This will be a visible and total Eclipse unto us in *England*, if the Air be clear, and therefore very worthy the pain of those industrious Astronomers among us to observe it. According to the Doctrine of *Alphonsus* and *Apian*, touching the concurs of Eclipses, the Moon, while she labours under this defect will appear of a blackish colour mixed with paleness.

The fourth and last Eclipse will be of the Sun, on *September* the second day, at our three a clock in the Morning.

Wackin' Mary is not only in a singular but a malicious
Quadruple of Saturnalia; and the Lord of the Seventh,
and in the twelve House; such a terrible Sorrow, An
gust, Contumacious, Embellishment and Slavery, &c. &c.
Can whole some view of the world be seen from
Let the dolorous Effects of the Port
tion of England's Enemies and of such as delight to disturb
the Government of Church and State in these Nations;
be assuredly they will, since Mary is strong and powerful,
and he is England's Patron or Guardian) and Saturn is
Lord of the Seventh, both essentially and accidently
weak, fully and plainly proving the same. But these
matters

matters being likely to be more largely handled by others, I pass all further discourse thereof, and come to speak

Of the General Quarters of the Year.

1. Of the Spring.

The Spring, the most pleasant and delightful Season of the whole Year, begins at that Moment of Time the Sun toucheth the very first Scruple of the Equinoctial Sign Aries, which generally happens about the tenth day of March, and in this year is commencing on March the ninth day, at eight Houres, three and the Minutes, P.M. or Afternoon, according to Gadlers Tables, and the true Figure of Heaven is as followeth.

This Spring Season continues until the Sun passeth the three first Northern Signs, viz. Aries, Taurus, Gemini. At the beginning of this Quarter the Sun makes Days and Nights equal over

all the World. And then leaving the Inhabitants of the Southern Hemisphere, do begin to refresh and revive

with his cherishing Beams all those that inhabit or dwell
in these Northern parts. But Ruler of this Quarter is
rejoice of the North and this Sign is as according to
Astrological Observation *Mars*, *Kings*, *Mars*, which
Planets are Signification of Vigour, Delight and Mera-
lity. And accordingly while the Spirit is in all Ver-
getables they a Spring-like force, when he is in *Earth*,
Plants and Trees in thick orchards, Leaves and Blo-
soms after a plentiful manner, to Rejoice the South
and Senes of Mankind. When he passeth through *Ge-
mini*, *Natures* Linnery are at work, and Paint to the
World Millions of pleasing Varieties, beyond the skill of
Spies, *Arts*, *Towers* or *Handis*, etc. These curious
Images of the Spring are void of Fraud, and know not
the Art of Treasuring. *Natures* another Symples tem-
pore to the Rock of Destruction. *Wasser* cankers in so-
berly, and without being bound to his *Ships* Masts may
delight in such harmless and delectable charms. The
Spring presents us with a Witchcraft so pleasing, glorious
and divine, that it is in in Mankind not to be bewitched
by it.

Of the Summer Season

THE *Season* or *Summer* Quarter begins always where
the Spring ends, the *Season* Mounching is *Aphe-
ron* Chir of Honour, is Removed to his greatest distance
from the Earth, making to us in these Northern
Country largest quantity of Sunshine, and least
portion of Shadow, or which is all one, longest days and
shortest Nights unto us.

This Season ever begins on the tenth day of June, at
what time the Sun enters the Tropical Sign *Cancer*, and
continues all the while he passeth the three Northern
Signes,

signs, viz. the Sun, Moon, and Planets, and the Ruler thereof are the Moon, Sun, and Mercury. The Moon here precedes the Sun in Government, and all the Births of the preceding Springs are now fixed to a pleasing Druggie, and is continued for the first Month of the Summer. And when the Sun assumes a particular (as well as a general power of Governing, and by his great Heat retheth all things from their Answared Swelling, to a robust Health, thereby ripening the Seeds of Flowers, Herbs, and Fruits. After this excellent Office of the Sun performing, it is to be seen upon the Regency of the last Month of the Quarter, and (the Moon being a cold and barren Sign,) he reduceth all things from their Hea-then condition, into a direct wariness. And now all things are ripe for the Sickle, and for the honest Harve-ster's Levelling Hand. And the finale of this Quarter being become thus desperate, its in vain to think to relieve it with a wasted and decayed spirit by Cordials, or to hope to retrieve it almost out of our life, by applying Copping, Glasses, Pigeons, &c.

Do you not see how orderly the Seasons of the year are Governed by the several Planets in their Turns; and this according to their Natures and Qualities, as Astrologers have distinguished them in the several Signs of the Zodiac? And now, having seen the Death of the Spring and Summer Season, thus only pleasant and delightful parts of the year, I beg you to be in the next place attend their Funerals. Which will be by considering of

The Autumnal Season or Quarter.

be Equinoxium Autumnale, or the Autumnal or Harvest-Quarter, is the third part of the year, and is the declining

And all things now look with a sad and un-
pleasant face, and a keen of all to wear the Image of Death and
mourning. Now, Hark! Black Death like the V. Beasts of the
wilderness, all things that upon Negatives to Delight and
Pleasure have in this Quarter their Regency.

Thus you see how all the Seasons are made, and by hanging and
contrasting Interests maintain a just and honest Nature, which is
One in itself, is yet pleased with Variety, so that we may truly
conclude with *Isaiah* to *Isaiah*, *Isaiah* 40: 6-8, *Isaiah* 40: 6-8, *Isaiah* 40: 6-8,
that the Change of all things is but a Vain Show, for as we see that
how that at the last Saturn (or Time) will be the Devourer of his
own Race, and how we are by his gentle moisture in a flow put
in to hope of an approaching Spring. And thus by this orderly
Rule of the Planets by turns through the several seasons of the year
we are put in mind of the several parts of our Lives agreeable there:
unto, viz. How we pass the Spring of our Youth, the Summer of
our Manhood, the Autumn of our declining years, and the Winter of
our Age. — Where Saturn (or Time) with his Iron Bands ready
to cut us down, and how, by passing through this Vale of Misery,
the Nature Dead, we pass to Immortality, and to a blessed Life,
where we shall see all the Troubles and Chances of Mortality be
made Partakers of the beatifical Vision, and behold God Almighty in
Glory. But

Oh! who shall tell who shall describe thy Throne,
Thou Great THREE-ONE!

There thou thy Self dost in full Presence show,
Not able from the meaner Worlds below.

No Earth nor Sea, the Elements, League would dare,
And all thy Creatures be with thy Nature Peace.

The Sun would stop his Course, or Gallop back,
The Stars drop out, the Planets themselves would crack.

Heaven's strong Foundations would be torn in twain,
And this vast Work all level out again.
